WELCOME TO AMP®

The Answer for All Things Digital Accessibility

AMP brings together the best accessibility tools on the market into one easy-to-use, cloud-based platform. With AMP, you can setup your own automated tests and reporting while accessing unparalleled remediation guidance and training resources.
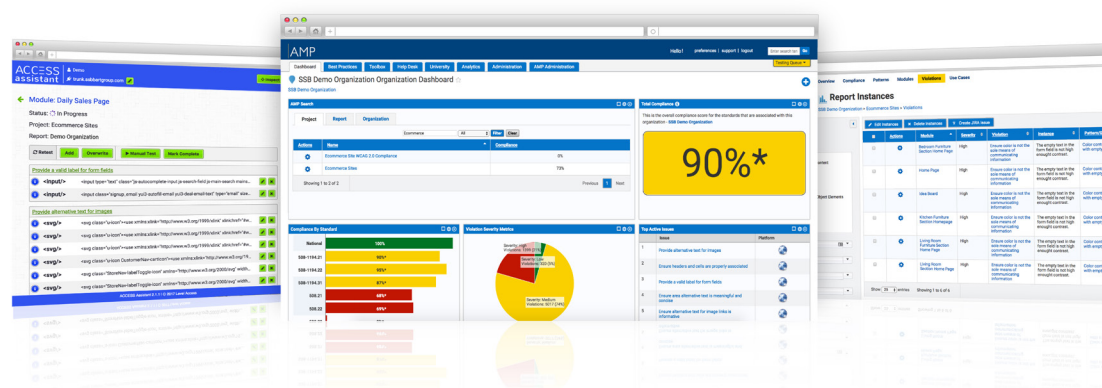

Digital Accessibility can seem complicated and overwhelming for any organization—that's why we created AMP, to make the entire process (much) easier and more effective.

AMP®

AMP provides the ability to perform a range of accessibility testing across a variety of platforms:

- Quickly integrate accessibility compliance into your development processes
- Get implementation standards and e-Learning specific to your development environment
- Record Macros to allow automated testing in complex scenarios, like behind authentication
- Test across all types of platforms including Websites, Web Applications, Mobile, Documents, Hardware, Software, etc.
- Choose your Compliance: Section 508, Americans with Disabilities Act (ADA), Communications and Video Accessibility Act (CVAA), Web Content Accessibility Guidelines (WCAG), and more!

Testing

Diagnose all iterations of a live page and not just the static code of the page—like other accessibility tools do. Use AMP to analyze real-time, dynamic content.

Best Practices Library

Putting general compliance guidelines into practice at the code-level can be difficult, unclear, and tedious. Fortunately, AMP has the largest and most advanced library of best practices to guide you—quickly and clearly.

Reporting

AMP's reporting allows organizations to document current accessibility status and compliance rates and then create a prioritized project plan for addressing issues. Tailor your reports to specific roles, compliance levels, guidelines, etc.

E-Learning

Educate your team to design, build, and test accessible IT systems with courses that cover general accessibility concepts.

Schedule a Demo

We'd love to demonstrate the power of AMP and show you how we can help your organization. Call our experts at 1.800.889.9659 or email Sales@LevelAccess.com for a demo today.

LEVEL access

Since 1997, Level Access has been developing software, training and consulting solutions to address the specific challenges presented by accessibility requirements. We're proud to have a diverse team of engineers, programmers and consultants, many of whom have disabilities themselves. This gives us a real edge in testing and creating products and services with accessibility and usability in mind.
